ARTIC not **ARCTIC**???

OK - some of our friends "up North" are feeling the chill of the ARCTIC cold fronts bringing some COLD winter storms this year. However, we may be able to WARM ☺ you up with a special deal if you are using IBM's *ARTIC* (A Real Time Interface Coprocessor) adapter.

We have a few of the ARTIC RS-422 "breakout" cables (IBM P/N 00F5524), the ones that have a large 80 pin "D" shell connector for attaching to the ARTIC card and a large "brick" with 8 RS-232/422 25 pin "D" shell connectors. Our offer - First come, first served at $50 each until they're gone.

We also have a few of the cables (IBM's P/N 85F0129) that connect from the "brick" to the Junction Box. Same deal - First come, first served at $20 each until they're gone.

If these fit your requirements, here's a chance to get a few spares at a bargain price.

**Thanks for giving us your time...
We hope you find these "News Briefs" informative.
☺**
