News Brief

School days, school days, wonderful back to school days...
(Luckily there is no music with this! ☺)

We have received a few requests for classes on the IBM Data Collection Software and are <u>asking for your help.</u>

First, there have been several different offerings:
1. DOS DCE (DOS Data Collection Edition)
2. OS/2 DCC-2 (OS/2 Data Collection & Control) and
3. DC Connect (runs under Windows NT as well as OS/2).
Which are you using?

Next, we need to know what level of class is needed:
1 Day: Overview and Functionality (What it can do)
2 Days: Installation, Configuration and Debugging (How to troubleshoot - Does not have to be a programmer)
4 Days: Basic Terminal Programming and Commands (For people with programming skills)
What is your requirement?

Thanks for giving us your time...

We hope you find these "News Briefs" informative.

☺
