

March 13, 2003 News Brief

www.data-collection.com

UPDATE...

In last week's News Brief I forgot to mention that the used 7526-200s we offered for \$495.00 includes a power supply (also 'used' of course) and a 90 day warranty.

IN ADDITION...

We also have some used laser barcode scanners for \$95.00 including the cable with pinouts for the 7526. These have been cleaned up and are in good working order. Tottie tests each one before she lets us ship it. 😊

DO YOU HAVE IBM 7527s?

We also have used power supplies for them -- our price is just \$50.00 each. Scanners & power supplies come with a 30 day warranty.

Is there someone else in your company that you think we should add to our mailing list? Send us their e-mail address and we'll happily oblige.

If you need help, ask us. We'd like to help. See the attached "Success Story" to see how we recently helped one customer.

Thanks for your business!

Ron, Jack, Tottie, Frank & Mike

Note: All prices on used equipment are valid until the items sell out.
