Sept. 04, 2003

## News Brief

[www.data-collection.com](http://www.data-collection.com)

### *Budgeting ?*

**Welcome back from your Labor Day Weekend.** This short week is reminding us that school is starting, this year budgets have to be spent and next year budgets need to be set in motion. With that in mind maybe now is a good time to evaluate a maintenance agreement for your Data Collection Terminals. We'll keep a "swap" unit on our shelf and when you need a unit repaired and we'll send the swap unit within one business day. When your unit arrives, we'll repair it and put it on the shelf ready to go the next time you need help. *Wouldn't it be nice if your car dealer delivered a replacement vehicle for you to use while they repair yours?*

Call Ron to discuss the possibilities and prices for YOUR installation.

### *Projects ?*

**Looking to close out this year or start next year by adding on to or upgrading your current data collection system ?** – Our new 7526 Ethernet ready Terminals will work with the Windows version of IBM'S DCCONNECT that also supports RF Terminals. The 7526 terminals will talk to the DCCONNECT server software thru your existing Ethernet in-house network, while maintaining connectivity to the old network. If you are not sure how to **get started**, **need some prices**, or just want to **check out an idea** with us, give us a call. We want to help you "Protect your Investment" and be business ready for the future.

Remember: We offer *Repair Service* and *Maintenance Agreements* for all three families of IBM DCTs - the ELF(7494/7525), 7526 and 7527.

*Thanks for your business!*

Ron, Jack, Tottie & Mike
