Your source for **NEW** 7526 Terminals

November 13, 2003
News Brief

www.data-collection.com

Do you have one or more "Remote" locations? Would you like to install a 7526 out there for Time & Attendance, Labor Tracking, Job Costing or other application but have trouble getting your software to "dial up" that location to upload transaction data? We have discovered a package that will help you do just that.

Are you still running the old "DOS-based" software and wish that you could get it converted to "WINDOWSⱼ"? This may be the opportunity you've been looking for.

No, we're NOT getting into the application software business - we're really hardware folks. However, when we find something we think will be useful we want to pass it along. Sooooo - if you are interested in more information just drop us an e-mail or give us a call.

☺

Thanks for your business!

Ron, Jack, Tottie & Ken
