*"Our Business is
IBM Data Collection"*

*This new version will appear in their next issue.
Keep an eye out for it and let us know what you think.*

Ooops - Glad some of you caught my error and let me know that my suggestion in last week's News Brief to turn the 7526 off with the key will NOT properly test the battery - in this case, OFF means OFF and the keyswitch does what it's told. The backup battery kicks in when you unplug the power supply. So much for "helpful hints". I'll follow Avis and "Try Harder" next time. ...and Thank You to everyone that wrote back! Jack...

Thanks for your business.

Ron, Jack, Tottie, Jeanne & Ken
