MORE SCANNERS...

We have recently received 6 Symbol laser scanners. The model number is LS-3280 and the label on the cables read "25-06711-02 REV A 9529 319" and they appear to be 25' long coiled cables. These do NOT attach to our 7526 or 7527 Data Collection Terminals but we understand that they attach to a "Keyboard Wedge" on a PC. There are only 4 cables for the 6 scanners but if you can use them we'll sell the whole box for \$100.00, about the price of one of the cables. We have no way to test them, but they came from a working installation. First come first served, but sold "as is" with no warranty.

Thanks for your business.

Ron, Jack, Tottie, Jeanne & Ken
