## News Brief

[www.data-collection.com](http://www.data-collection.com)

### We accept CREDIT CARDS ?

We have recently had an increasing number of requests for us to accept credit cards for small orders because it can be troublesome to go through the process of getting a Purchase Order for a wand, slot reader, scanner or some other low priced item. We accept VISA or MASTERCARD for orders up to \$300.00. This will allow many department managers to get replacement items ASAP via a phone call instead of having to go through a lengthy PO process.

### Quick Questions:

- 1.) Do you have one or more "Remote" locations?
- 2.) Would you like to install a 7526 out there for Secured Access Control, Time and Attendance, Labor Tracking, Job Costing or other applications but have trouble getting your software to "dial up" that location to upload transaction data?
- 3.) Are you still running the old "DOS-based" software and wish that you could get it converted to "WINDOWS"?

**We have discovered a package that answers these questions.**

This may be the solution you've been looking for. When we find something we think will be useful we want to pass it along. So, if you are interested in more information just drop us an e-mail

 *Thanks for your business!*
